Mail-in Quiz 34

Review the Transcription Tips, and then follow the Report Instructions.

Transcription Tips

Report 1
OBJECTIVE
Although the doctor dictates “apposition,” “opposition” is the appropriate term based on the context. It is difficult to understand what the doctor says about opposition, “over 5 opposition.” Listen to the rest of the paragraph and note that he says there is considerable weakness of the right hand. Using this information, do you think there was 1/5 opposition or 4/5 opposition? Transcribe the appropriate value.

PLAN
There is a dictation error in this section. Research terms here to determine which word is incorrect and edit.

Report 2
SKIN: The subheading Skin can be found under PHYSICAL EXAMINATION or REVIEW OF SYSTEMS. Under the REVIEW OF SYSTEMS, the doctor would report any skin complaints the patient reported. Under PHYSICAL EXAMINATION, the doctor would report the findings of his examination of the skin.

Report 3
EXTREMITIES: While discussing the RLE, the doctor dictates a complete sentence and then decides to rephrase the sentence. Did you catch this? Transcribe only the rephrased sentence.
Report Instructions

In order to ease you into transcription, you’ll fill in the blanks for the following reports as you listen to the dictation.

Audio Exercise

Follow these steps:

a. Access your audio for Lesson 46 Quiz 34—Reports 3.

b. As you listen to the audio, follow along with the reports below and write in the missing words. Feel free to pause the audio at any time.

c. Research to confirm the correct term and spelling. Proofread your work.

d. Once you are satisfied with your researched terms, type each report in its entirety. **Bold** the terms you filled in. You must submit complete reports to the school to receive credit for the Quiz. Be sure your reports are formatted correctly, using the format guidelines set forth in this course. Your typed reports must look neat and professional.
Report 1

Listen to the audio to fill in the blanks. This report is worth 29 points.

Name: ________________

PROBLEM #4 _______________ joint replacement, right _______________ joint.

SUBJECTIVE
Patient _______________ underwent joint replacement _______________ at the _______________ of the right ___________________. She has experienced _______________ of the _______________ component which was placed into the area without _______________.
